Shaping The ” World we Imagine

Techno Zone is an authorized distributor and stockiest for ESAB. The ESAB brand is synonymous with world leading expertise in four key areas manual welding and cutting equipment, welding automation, welding consumables, and cutting systems, related safety products. Our products are used in a variety of fields: structural steel works, fabrication, marine and oil & gas services.

We have provided the best industrial solution to our customers for developing businesses in the last 22+ years

Company Summary

Techno zone was established in the year 2000, with a clear focus on specializing in Industrial Tools and Safety Materials. We formed valuable partnerships with factories located in both Europe and Asia, allowing us to manufacture, import, and keep a ready stock of these high-quality products. Our commitment to excellence and reliability quickly gained traction, leading us to serve not only local business houses but also various companies and neighboring Gulf countries

Clients

Vision

Our vision is to be recognized as the premier supplier of industrial solutions, leveraging our expertise, global partnerships, and technological advancements. We aim to continuously expand our product range, enhance customer satisfaction, and foster long-term collaborations to drive growth and create value.

Mission

Our mission is to deliver high-quality industrial products and solutions that empower our customers to excel in their respective fields. We strive to meet and exceed customer expectations through exceptional service, technical expertise, and a diverse range of innovative products.

Together,
We Shape The Future
Of Welding And Cutting

ESAB arc welding equipment solutions tackle every manual welding process.

Metal fabricators rely on ESAB for virtually every welding process: MIG (GMAW), Flux Cored (FCAW), Stick (SMAW), TIG (GTAW), Multi-Process Welders, Submerged Arc (SAW), Electroslag Welding (ESW) and Weld Quality Systems.

Why choose ESAB arc welding?

A single-source welding solution

Welding power sources are just the beginning. To maximize results, add ESAB wire feeders, MIG guns, MIG consumables, TIG torches, electrode holders, accessories, and filler metals.

Industrial welding at the highest level

Fabricators and manufacturers use ESAB equipment to boost efficiency, improve quality, simplify training and satisfy their most demanding customers.

Welders built for the way you work

Our products are inspired by welders like you. ESAB listens, then builds the tools welders want and need. Our broad portfolio offers the right experience for novices and master fabricators alike.

Welders for steel, stainless, aluminum and much more

If there's a need, we have the technology. Then we back technology with application expertise and to make users more productive than ever before.

ESAB CNC Cutting system

ESAB manual plasma systems are engineered for cutting power.

Through its Thermal Dynamics brand, ESAB offers manual plasma cutters to improve cut quality, precision and efficiency in the shop or field. Plasma gouging consumables for metal removal, mechanized plasma torches and cutting modes for expanded metal (grates) add further application flexibility.

Why choose ESAB manual plasma ?

Power, portability and performance

Lightweight Thermal Dynamics plasma cutters are packed with power, offering the highest power-to-weight ratio in their category. From sheet metal to thick plate, users can take on more fabrication challenges.

Material and location flexibility

Plasma cuts mild steel, stainless steel, aluminum and virtually any metal that conducts electricity. Coupled with input power flexibility and extreme durability, air plasma cutters go wherever the work takes you.

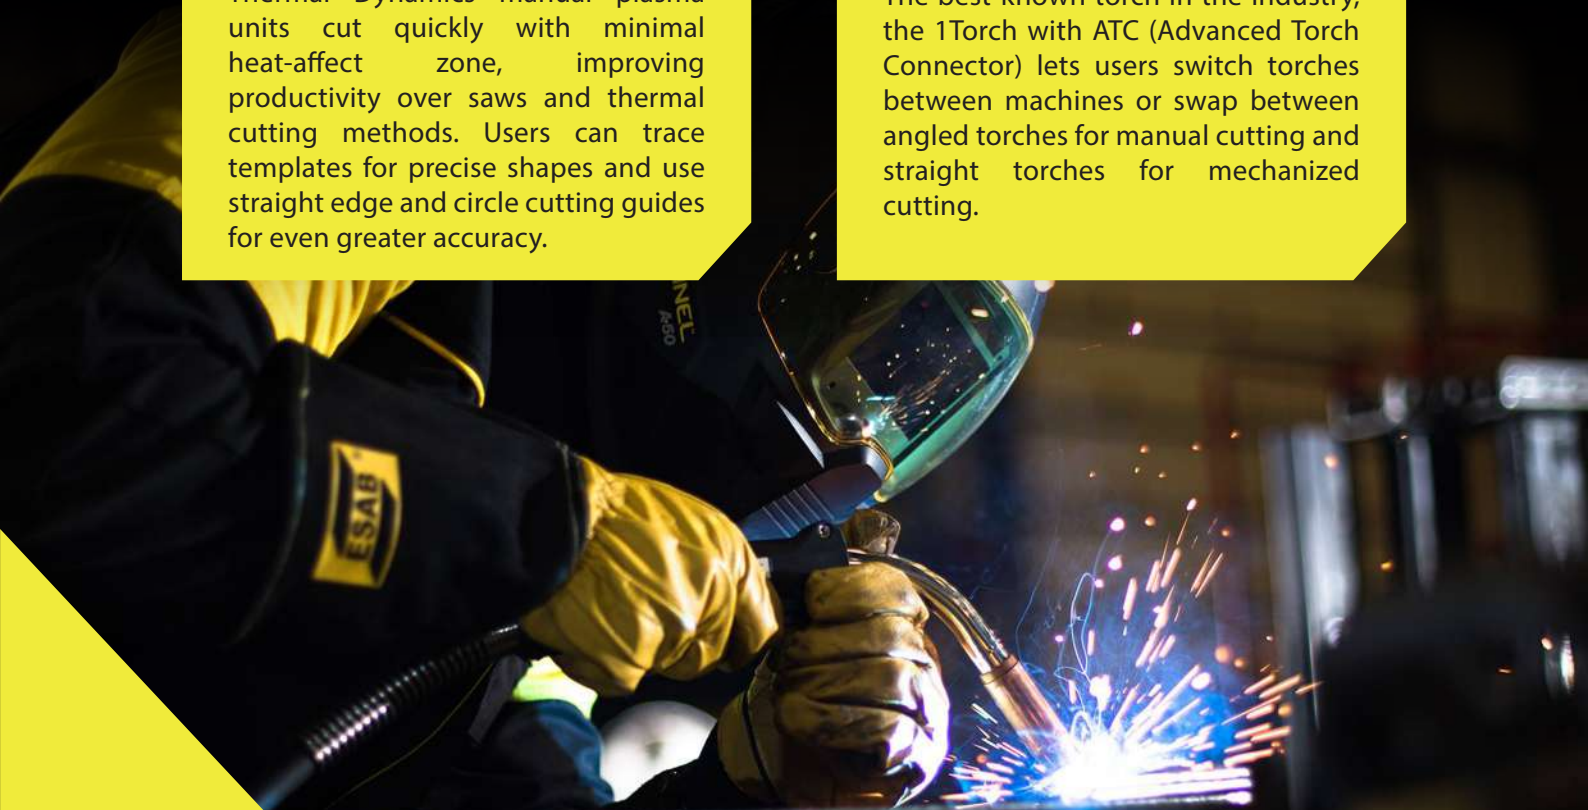

Productivity booster

Thermal Dynamics manual plasma units cut quickly with minimal heat-affect zone, improving productivity over saws and thermal cutting methods. Users can trace templates for precise shapes and use straight edge and circle cutting guides for even greater accuracy.

Torch performance

The best-known torch in the industry, the 1Torch with ATC (Advanced Torch Connector) lets users switch torches between machines or swap between angled torches for manual cutting and straight torches for mechanized cutting.

WELDING CONSUMABLES

**Welding
electrodes (VP)**

**Welding
electrodes**

**Flux
cored wire**

Mig wire
